

PLEASE do not repeal or relax the current laws that are in effect to limit the control that any one news agency may have over a given region. Freedom of press is one of the fundamental things that makes this country great. This freedom can only be maintained by ensuring that there is a healthy competition between news sources. Giving large news conglomerates the power to dominate any one region, and yes, even the country, is dangerous to the citizenry. Citizens of countries like Afghanistan and Iran have already lost any ability to get news from independent sources. Don't let our country fall into that same lot! Please keep our system of checks and balances in place.
